

# Qualitative Research while working from home using webQDA

Michael White<sup>1</sup>

<sup>1</sup> Research Office, Universidad Peruana Unión, Peru. michaelwhite@upeu.edu.pe

**Abstract.** Research doesn't stop just because we can't go to our offices or out in the field. Social media and virtual conference rooms allow for a wide range of qualitative research studies, even while working from home. This workshop will show you some practical examples of how you can use webQDA to organize and analyze qualitative data from places you might not expect in order to inspire you to create your own qualitative research project. Facebook, Google Forms, Zoom, WhatsApp, and even YouTube can be used with webQDA. Want to know how? Come see how easy it is in this hands-on, informative workshop. All you need is a free 15-day trial of webQDA to get started!

**Keywords:** Qualitative research, Social media, Online research projects

**Necessary resources:** An active webQDA account (paid, or a 15-day free trial – register at [webQDA.net](http://webQDA.net))

## Biographical note

Michael White is the Head of Scientific Translations and Publications at the Universidad Peruana Unión. He has participated in several research projects in English and in Spanish, with 7 articles published in Scopus with more on the way. Recently, he hosted a webinar on the WebQDA YouTube channel to show their English-speaking audience how versatile this online platform can be.
